

In Antananarivo, the capital of Madagascar, a group of artisans have practically set about to tackle an increasing environmental problem.

Here Tins-become-things!

Step 1) Ingredients:

Material (tins & cans)

Good ideas

Wish-to-work

Artistic talent & Craftsmanship

Step 2) Cut and form.
Soldering follows.

Step 3) A little paint on the wheels and assembly

Result!

Important: Right materials for the right result! The bottom of the cans becomes the wheels of the motorcycle.

**Recycling:
The Whole World Wins!**
